Synthetic Rubber
Creating the way the world moves today.

Amazing India

“India’s surprising economic miracle”

Source: The Economist, October 2-8, 2010

LANXESS – The world's leader in synthetic rubber

- Invention of synthetic rubber more than 100 years ago in the labs of our predecessor company
- Enabling innovative rubber products, e.g., safer, energy-saving green tires
- Continuous development of new applications for high-performance rubber to deliver value for our customers

The future looks bright in India

LANXESS

100 Years

Synthetic Rubber

Creating the way the world moves today.

The mobility megatrend is driving the future

Rapidly increasing mobility

- Rubber has a major role in the mobility megatrend
- India – one of the fastest-growing automotive markets in the world
- High-performance tires contribute to safer, more energy-efficient mobility

India on the threshold of a transformational shift to high-performance tires

New butyl production facility in Singapore as of 2013

LANXESS will provide a reliable supply of high-performance rubber for India

State-of-the-art Rubber Chemicals plant in Jhagadia

LANXESS is committed to better serving the rapidly growing rubber industry in India

The urbanization megatrend is driving the future

Ever-rising urbanization

- Rubber has a major role in the urbanization megatrend
- Stunning expansion in construction and infrastructure projects in India
- Synthetic rubber enabling future urbanization

Rubber products have an indispensable role in nearly every phase of urbanization

Synthetic rubber – One of the most remarkable materials

- Synthetic rubber is one of the most versatile industrial products ever to emerge from a laboratory
- Synthetic rubber improves our lives in thousands of ways
- Synthetic rubber has a great future in India

We still have every reason to honor the invention of synthetic rubber today
